ALAM SHER BABAR

landscape | Irrigation Engineer
PEC Registration: Agri/05302 | **Mobile (KSA):** +966 56 320 9514 |
Email: alamsherbabar.khan@gmail.com | **LinkedIn:** linkedin.com/in/alam5121472/
IQAMA: Immediately Transferable | **MAKKAH, KSA**

PROFILE

Landscape and **Irrigation Engineer** with **9 years** of diverse experience in HEIS irrigation installation, landscape infrastructure, farm operations, and field management. Skilled in basic irrigation design, water requirement estimation, BOQ/BOM preparation, softscape & hardscape works site supervision, and technical coordination. Experienced in mid-level management, team leadership, and supporting engineering functions across varied client environments. Consistently delivers project tasks within defined timelines, budgets, and quality standards.

CORE SKILLS

- Native & Drought-Resistant Plants
- Irrigation design: pipe sizing, hydraulic calculations, water demand estimation, and scheduling.
- Installation, inspection, and troubleshooting of HEIS, drip, sprinkler, and conventional systems.
- BOQ/BOM preparation, material selection, procurement coordination, and vendor management.
- Softscape supervision: soil preparation, planting, irrigation integration, and quality control.
- AutoCAD drafting for irrigation layouts, planting plans, and as-built drawings.
- Site supervision, reporting, documentation, progress tracking & compliance with landscape standards
- Team leadership, task delegation, technical coordination, and communication with engineers, agronomists, and field staff

PROFESSIONAL EXPERIENCE

Company: *Nasser Saleh Bin Mani Al balharith Nursery Company* | **Duration: Dec** 2025 – Current
Position: Landscape Engineer
Job Description:

- Assisted in designing HEIS layouts and preparing basic hydraulic calculations.
- Conducted field visits to check soil conditions, crop requirements, and system efficiency.
- Supported proposal verification and ensured designs followed client and government requirements.

Company: HYDROPAK INTERNATIONAL | **Duration:** March 2022 – May-2025
Position: Irrigation & Landscape Engineer – HEIS Projects
Job Description:

- Assisted in designing HEIS layouts and preparing basic hydraulic calculations.
- Conducted field visits to check soil conditions, crop requirements, and system efficiency.
- Supported proposal verification and ensured designs followed client and government requirements.
- Supervised drip & sprinkler installations, ensuring spacing, pressure, alignment, coverage & performance compliance.
- Prepared bills of materials and coordinated material delivery with the project team.
- Performed system testing, commissioning, and prepared performance reports.
- Engaged with consultants (including NESPAK) for design clarifications and approval processes.
- Trained field staff on system installation, maintenance, and troubleshooting.

Company: PAK CHEM INTERNATIONAL (PVT) LTD | **Duration:** Dec 2016 – Jan-2022
Position: Farm Manager | Narowal R&D Wing
Job Description:

- Managed farm operations: irrigation scheduling, crop planning, soil fertility & resource allocation.
- Supervised installation, operation & maintenance of drip, sprinkler & conventional irrigation systems.
- Softscape activities: soil preparation, planting, mulching, and plant establishment.
- Conducted soil and water tests to optimize irrigation and fertilization strategies.
- Trained staff and farmers on modern irrigation, softscape, and farm management practices.
- Coordinated research trials on crops, fertilizers, and irrigation methods; prepared technical reports.
- Ensured compliance with agricultural standards, quality control, and safety protocols.

Company: MUHAMMAD NAWAZ SHARIF UNIVERSITY OF AGRICULTURE, MULTAN
Duration: Dec 2015 – Nov-2016
Position: Research Officer / Lecturer in Farm Management Division
Job Description:

- Supervised research plots, irrigation layouts, and field infrastructure.
- Assisted in water management strategies and irrigation efficiency trials.
- Conducted experiments on crop growth, soil–water management, and softscape practices.
- Collected and analyzed data, preparing reports and technical documentation.
- Monitored experimental irrigation systems and coordinated with research staff.

EDUCATION

University of Agriculture Faisalabad

M.Sc. (Hons.) Irrigation Engineering	**2014–2017**	**CGPA: 3.22/4.00**
B.Sc. (Hons.) Agricultural Engineering	**2010–2014**	**CGPA: 3.25/4.00**

ACADEMIC RESEARCH

M.Sc. Thesis: Estimation of Water Productivity Under Deficient Irrigation Levels Using DSSAT Model

Objectives

- Evaluation of Minimum Water required by Wheat crop for maximum Yield as output.
- Performance evaluation of water i.e. how irrigation effect on biological yield.

TRAININGS & CERTIFICATIONS

- HEIS Operation, Troubleshooting & Irrigation Design
- Solar & Electric Pump Systems (KSB, HMA, Hydromech)
- Softscape & Landscape Planting Practices
- Farm & Field Management, Crop Planning & Soil Fertility
- Advanced MS Excel & PowerPoint for Reporting & Presentations
- Professional Development: Leadership, Team Management & Communication

TECHNICAL & SOFTWARE SKILLS

- HEIS, drip, sprinkler & conventional irrigation systems
- Basic irrigation design, hydraulic calculations & scheduling
- Softscape support: soil prep, planting & irrigation integration
- AutoCAD for layouts and planting plans
- BOQ/BOM preparation, material coordination & site supervision
- MS Office: Excel, Word, PowerPoint
- GPS & mapping tools: Garmin Map Source, Lorentz Compass
- Field problem-solving, team coordination & adaptable to Gulf standards

HONORS & ACHIEVEMENTS

- Head, University Tree Plantation Committee
- Member, University Farm Advisory Committee
- Prime Minister's Merit Laptop Award
